

FU-36

LOW LOST CE UL CLIP-ON SPLIT CORE CURRENT TRANSFORMER

FU-36 split core current transformer is low cost ac current sensor, measuring AC current from 5A to 600 Amps passing through the center conductor. This model has four diameter version (10mm, 16mm, 24mm and 36mm), suite for all kinds of customers application. Split core CTs are designed for fast and easy installation. The split core design permits non-contact current measurements through magnetic field induction without requiring that the primary wire be taken offline and disconnected for CT installation. This method permits a safer, easy and portable current measurement.
