10KV HIGH ACCURACY INDOOR VOLTAGE TRANSFORMER

GFJDZX0978-10BG 10KV HIGH ACCURACY INDOOR VOLTAGE TRANSFORMERS are designed for metering and protection applications. This product has the characteristics of high efficiency and large capacity, and can be customized according to customer requirements.

The primary and secondary coils are wound using special winding and shielding techniques for improved voltage stress distribution. Each coil is carefully insulated with mylar film to provide a high dielectric medium between layers. The completed winding structure and double-loop cores are assembled to a support frame.

For insulation and protection, the assembly is cast in hydrophobic cycloaliphatic epoxy (HCEP) using automatic vacuum pressure. The HCEP material offers superior arc track, ozone, and ultraviolet-resistive properties while maintaining physical strength. The hydrophobic surface properties of HCEP ensure highly reliable performance in wet, humid, or polluted environments

It can be used for 10KV distribution line, Coal mine, power plant, Rail way, Factories... Strictly Comply IEC60044-2; IEC 61869-1,3; ANSI/IEEE C57.13
